## ***the total solution***

For more than two decades Chemex has provided **expertise, innovation and market leading products** for every type of industry throughout the UK.

The **consultancy, specialist advice and training** we offer our customers in the hygiene and food sectors is second-to-none; whether it's hospital-acquired **infection control**, entire **hygiene systems** for food preparation, or large-scale laundry or dish wash systems, we have the products and expertise to give you **peace of mind**.

Our products lead the industry. **None is tested on animals** and most are supplied as concentrate which lowers our carbon footprint. All our products used in food preparation are effective against organisms such as *E coli*, *Salmonella* sp and other common food-borne

pathogens. They are also alcohol-free and so are suitable for use in Halal kitchens.

Our healthcare products are proven effective against *Staphylococcus* sp including MRSA and we can set up entire **hygiene control programmes** from specialist advice and product procurement to training individual staff members.

We also provide solutions to the automotive and construction sectors and to a wide range of other businesses.

Our network of specialists can design and supply storage and **dispensing equipment** from simple Venturi systems to bespoke barrel and tank arrangements, ensuring maximum efficiency and minimum cost per application. Sophisticated **dosing equipment** controls your costs and offers maximum effectiveness with minimum environmental impact.

# Contents

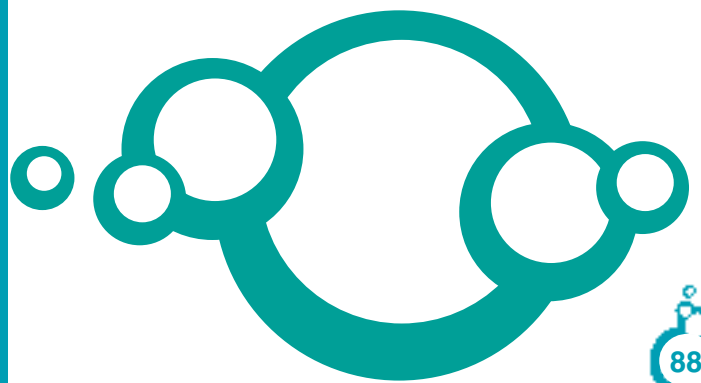

Chemex provides a local service through an independent national network, enabling you to take what you need, when you need it, regularly or as the need arises. No more waiting weeks for deliveries, inconvenient minimum order quantities or cupboards full of stock. Over four hundred products are available on demand from our mobile showrooms, with expert advice on efficient application.

We also supply a range of **ancillary products** from plastic sacks to paper and soap dispensers to safety equipment.

**Chemex.**  
**Market leading solutions**  
**for today's environment.**

# The Chemex Approach to Preventing MRSA

**Bacticlean**  
 CODE: 1614  
 Pack Size: • 5 litres  
 Bacticlean safely cleans and sanitises all hard surfaces and is particularly effective on body fats, grease and grime and can be diluted up to 50:1.  
 • MRSA • E.coli • Listeria sp.  
 • Salmonella sp. • Staphylococcus aureus

**FAD**  
 CODE: 1301  
 Pack Size: • 5 litres • 25 litres • 205 litres  
 Triple action - safely cleans and sanitises food contact areas and leaves a pleasant fragrance. It quickly removes food and animal fats, grease and grime. It has been independently tested to give proven kill rates against a wide range of bacteria.  
 • MRSA • Aspergillus niger • E.coli  
 • Listeria sp. • Salmonella sp.  
 • Staphylococcus aureus

**Bacteria X**  
 CODE: 1302  
 Pack Size: • 5 litres • 25 litres  
 Concentrated quaternary ammonium compound based sanitizing rinse for use on processing equipment and other hard surfaces. Use for sanitizing after the main cleaning process.  
 • MRSA • Aspergillus niger • E.coli  
 • Listeria sp. • Salmonella sp.  
 • Staphylococcus aureus

**Safewash**  
 CODE: 1319  
 Pack Size: • 5 litres • 25 litres  
 A bactericidal detergent. It is free- rinsing to leave items streak-free, giving an excellent finish to glassware etc.  
 • MRSA • E.coli • Listeria sp.  
 • Salmonella sp. • Staphylococcus aureus

**Bacti-Wipe**  
 CODE: 2911  
 Pack Size: • 500 wipes  
 Disposable bactericidal sanitizing wipes effective against *Salmonella*, *Staphylococcus*, *Escherichia coli*, *Listeria* and *Streptococcus*.  
 • MRSA • E.coli • Listeria sp.  
 • Salmonella sp. • Staphylococcus aureus

**Smoke Clean**  
 CODE: 1325  
 Pack Size: • 5 litres • 25 litres  
 Heavy duty degreaser and decarboniser. Effective on burned on grease, smoke and carbon deposits.  
 • MRSA • Aspergillus niger • E.coli  
 • Listeria sp. • Salmonella sp.  
 • Staphylococcus aureus

**Kleenfresh Ultra**  
 CODE: 1522  
 Pack Size: • 12.5 litres  
 A premium quality-high performance liquid laundry detergent that is biodegradable and is suitable for all laundry applications. It is highly concentrated and suitable for use in all water areas. It will give excellent results where other "ordinary" or "economy" products struggle to perform.  
 • MRSA • E.coli  
 • Staphylococcus aureus

 CODE: 1405  
 Pack Size: • 5 litres  
 Alcohol based hand cleaner. Evaporates rapidly. Provides instant skin sanitization.  
 • MRSA • Aspergillus niger • E.coli  
 • Listeria sp. • Pseudomonas aeruginosa  
 • Salmonella sp. • Staphylococcus aureus  
 • Staphylococcus epidermis

**Optimum C**  
 CODE: 1300  
 Pack Size: • 5 litres • 25 litres  
 Heavy duty decarboniser/ degreaser. Particularly effective for cleaning ovens and deep fat fryers.  
 • MRSA • Aspergillus niger • E.coli  
 • Listeria sp. • Salmonella sp.  
 • Staphylococcus aureus

**Safe Hands**  
 CODE: 1400  
 Pack Size: • 1 litres • 5 litre  
 Bactericidal handcleaner for use in food preparation areas.  
 • MRSA • E.coli • Listeria sp. • Pseudomonas aeruginosa  
 • Salmonella sp. • Staphylococcus aureus

# MRSA

Are you safe?

## What is MRSA?

MRSA is shorthand for Methicillin-Resistant *Staphylococcus aureus*.

*Staphylococcus aureus* (commonly known as Staph) is one of the most commonly found bacteria. It usually lives harmlessly on human skin. Staph has become dangerous as it is so difficult to treat due to a strain of this bacterium becoming resistant to antibiotics such as methicillin, penicillin and amoxicillin.

## MRSA in Nursing & Care Homes

30% of the population carry MRSA which lives harmlessly on their skin and is not usually a problem in the general population, including nursing and care homes.

However it can become a problem in the sick or weak which is why it causes so many problems in hospitals amongst vulnerable people.

Patients residing in close proximity who have regular skin contact with the same nursing staff have a high risk of contracting the infection.

## How can MRSA be prevented?

Not only is MRSA spread through skin-to-skin contact, it can also survive and spread through inanimate objects or surfaces such as linen, sinks, floors and mops used for cleaning. For this reason, areas where patients with MRSA are nursed should be thoroughly cleaned using the correct cleaning products and techniques.

The essence of infection control is good cleaning practice. Disinfecting and sanitizing agents are very useful in killing bacteria but unless the surface itself is clean, the disinfection and sanitizing will not be effective.

## Community-Acquired MRSA

A rare strain of *Staphylococcus aureus* is C-MRSA (Community-Acquired MRSA) which has none of the recognised risk factors associated with MRSA and affects healthy people of all ages. C-MRSA is associated with skin abrasions and has been found in communal changing areas in sports clubs where close contact sports are played. Other groups of people who are at risk of contacting C-MRSA include prison inmates and drug users sharing needles.

The C-MRSA infection is more sensitive to antibiotic treatment than hospital acquired MRSA and can be treated using antibiotics, however good hygiene and cleaning practice is the recommended preventative action and will reduce the spread of the infection.

“Hospital infections, like MRSA, are the new British Disease. They kill at least 5,000 people a year, more than die on our roads.”

“The best way of saving people is with hygiene - yet simple procedures are still not being practiced.”

*The Independent*

## How do Chemex products & cleaning programmes help?

Chemex offers a range of cleaning and sanitizing agents which are widely used in the healthcare and leisure sectors to provide effective protection against MRSA.

An important aspect of the Chemex approach to cleaning in these areas is effective staff training to complement market-leading products. Cleaning and hygiene control programs are set up and cleaning and care staff are tutored by trained distributors in the proper effective use of the products to create and maintain a clean, safe environment.

Microbiological test certificates are available for all marked products

# General Cleaning

No matter what business you are in, you need to ensure the highest standards of hygiene and safety in all your work areas. Chemex provides a range of solutions for your entire business; from bleaches and floor cleaners to fragrances and hand gels.

Our general cleaning range is second-to-none and can be supplied with dispensers and ancillary products to give you the convenience of single-source supply and the ability to control your costs effectively.

Talk to us about our unique Hygiene Control Programmes which provide all your health and safety data, training for your staff, and peace of mind for you.

## FAD

CODE: 1301

Pack Size: • 5 litres • 25 litres  
• 205 litres

Bacticlean safely cleans and sanitises all hard surfaces and is particularly effective on body fats, grease and grime and is concentrated for economy.

- MRSA • E.coli • Listeria sp.
- Salmonella sp. • Staphylococcus aureus

## Powerklean

CODE: 1616

Pack Size: • 5 litres • 25 litres

A multi purpose floor and wall cleaner with proven bactericidal results across a broad spectrum.

“I have been using Chemex in London since 1998 in more than one hotel and I will take them where ever I go, not only have they provided me with better products but I am also saving around 30% on my cleaning budget. Having used other suppliers in London and then changing to Chemex I would recommend their services to any housekeepers. Chemex have certainly made my job easier as an Executive Head Housekeeper providing my hotels with multilingual wall charts and regular staff training.”

Mary Duffy -  
Executive Head Housekeeper  
**Holiday Inn**

# Floorcare

Whatever the type of floor or your particular cleaning problem, Chemex has developed a wide range of floor cleaners and floor treatments, ranging from heavy duty strippers to neutral, natural wax products which can be used to clean and buff simultaneously.

Whether removing grease and fat in food preparation areas, oil on concrete, or maintaining your polished floor, Chemex has a solution. We also supply floor cleaning products containing pleasant, natural fragrances which will leave the entire area clean and fresh.

Unlike many fragranced products, ours contain natural plant extracts rather than chemical-based artificial scents.

We have also developed a range of hard surface cleaners and polishes to complement our range of floor cleaning products, all of which can be used safely on most surfaces ensuring a professional finish.

The Chemex floorcare range can clean any floor or hard surface efficiently and effectively. Fewer applications means cost savings for you – both in terms of product and staff time – and our MRSA range offers you total peace of mind when cleaning communal areas.

## Hyclean

CODE: 1602

Pack Size: • 5 litres

A pine gel buff and shine for all hard surface floors. Mop and buff to leave a high sheen.

## Kleenall

CODE: 1601

Pack Size: • 5 litres • 25 litres

Neutral multi-purpose cleaner concentrate with a powerful but mild formulation for use on all surfaces.

## Fabrique Perfumed

CODE: 1609

Floor maintainer/ cleaner. A neutral blend of detergents and waxes to clean, freshen and maintain a high gloss. Concentrated formula for economy of use.

“I have been using Chemex products since the inception of this hotel and I have always been provided with good quality chemicals and a very quick and efficient service. Chemex are always looking to help suggesting ways in which I can reduce my budget which is one less thing I have to worry about.”

Amanda Straughan -  
Executive Head Housekeeper  
Victoria Park Plaza Hotel

# Catering & Food Processing

In the catering and food preparation industry, impeccable hygiene control is just as important as the dishes that bring your customers back time after time.

Our key food area products are proven to be effective against pathogens such as *E. coli*, *Listeria* and *Salmonella*, and we can provide hygiene control programmes tailored to your specific needs.

This may involve staff training, COSHH data management, colour-coded products for specific areas and independent swab testing to prove the systems are working effectively.

The Chemex Hygiene Control Programme allows you to concentrate on your business while we take care of product procurement, training and compliance with best practice and current legislation.

## Smoke Clean

CODE: 1325

Pack Size: • 5 litres • 25 litres

Heavy duty degreaser and decarboniser. Effective on burnt on grease, smoke and carbon deposits.

• MRSA • *Aspergillus niger* • *E. coli*  
• *Listeria* sp. • *Salmonella* sp.

CODE: 1324

Pack Size: • 5 litres • 12.5 litres  
• 205 litres

Premier dishwashing rinse aid for a dry gleaming finish to any automatic dishwashing cycle.

“Running London's no1 fresh fish supplier is no easy task having regular BRC inspections and audits to prove our levels of hygiene are above the required standards. Chemex have provided me with their products and services since 1999, from compiling hygiene surveys to completing COSHH staff training Chemex are a very sharp team who also save me money !”

Les Ironman  
Southbank Fresh Fish

# Personal Hygiene & Infection Control

The rise of hospital-acquired infections, ever more resilient pathogenic organisms and the attendant legislation intended to control them seems to spiral out of control year on year.

With over twenty years' experience in the healthcare industry, Chemex has developed a range of products which – when used properly – are proven to be 100% effective against common pathogens, including MRSA. Of course, any such product only works when your staff have received the correct training; speak to your Chemex specialist about how our hygiene control systems can help you meet the ever-increasing standards of cleanliness expected of patients and staff.

Protect your staff, your patients and your business with our unique products and services – quite simply the most comprehensive and effective in the marketplace.

# Garage & Transport

From tyre dressings to TFR's, we offer one of the most comprehensive ranges in the marketplace, with products to suit your individual needs, whatever your budget.

Within our TFR range alone, there are eight different cleaning solutions, each formulated to meet specific cleaning requirements.

Safe to handle and easy to use, our products have been designed to tackle any surface from the very dirty to the very delicate, whether heavy plant, sign written PSVs, curtain-sided trailers, livestock transporters or food and refrigerated transport.

Quality paintwork requires professional treatment, that's why we have developed dedicated products for every PDI requirement, as well as a valeting range that encompasses all your needs from perfect polishes to fantastic finish restorers.

## Hazeaway

CODE: 1104

Pack Size: • 5 litres • 25 litres

Premier all year round windscreen de-icer and wash additive.

## Oilex

CODE: 1105

CODE: 1211

Pack Size: • 5 litres

Effectively removes tar and sticky residues from vehicle paintwork.

“The service we get from Chemex is first class and all of the products we use do exactly what they say they'll do.”

Glen Short -  
Project Manager

**Oil & Water Ltd, Shaftesbury, Dorset**  
(Oil, Tank and Cleaning Specialists)

# Equipment

Talk to your Chemex specialist about our ranges of ancillary products. We can supply all of your needs from safety equipment to mops and buckets to plastic aprons and paper towels.

- Colour-coded ranges to easily differentiate working areas.
- Specialist product procurement – we can design an entire hygiene control system around the specific needs of your business.
- Bespoke dilution systems to control your costs and mitigate environmental impact.
- Point-of-use hygiene systems from simple hand soap dispensers to automated ambient odour control.
- Inventory control programmes so you can concentrate on your business.

“Our single source supply philosophy means that you can source everything from your Chemex specialist – even paper consumables and associated dispensing systems to help control your costs.”

# Capital Equipment

Chemex's 20 years' experience in total hygiene and cleaning solutions means that we can supply a whole range of professional laundry equipment, dishwashers, hot and cold pressure washers, glasswashers, vacuums, sweepers and scrubbers.

# Would you rather be Selling than Buying?

**Chemex is one of the UK's longest-established and most respected franchise opportunities.**

Our network of franchised operators provides market-leading products, consultancy and training to customers across the UK, in Europe and beyond.

And because it's a franchise, they are in business for themselves, but with the support of a major multinational corporation behind them.

**Have you ever dreamed of owning your own business?**

**Chemex offers a proven route to success.**

If you have the drive, determination and people skills, we can offer the training, support and world-class products to build your own successful franchise.
